- Portfolio: heet18.vercel.app

Summary

g with large datasets, building predictive models, and visualizing insights. Proven ability to work independently and learn quickly in new environments.

Education

- B.Tech - Computer Science and Engineering
- CHARUSAT University (CSPIT), Anand, Gujarat
- 2024 - Present
- Specialization: Web Technologies and AI/ML
- Active in hackathons, coding contests, and open-source projects

Technical Skills

- JavaScript
 - TypeScript
 - C
 - C++
 - Java
 - HTML5
 - CSS3
 - React 18
 - Tailwind CSS
 - Redux Toolkit
 - Vite
 - Responsive Design
 - Node.js
 - Express.js
 - REST APIs
 - WebSocket
 - MongoDB
 - Mongoose
 - Python
 - scikit-learn
 - TensorFlow
 - OpenCV
 - NumPy
 - Pandas
 - Git
 - GitHub
 - Docker
 - GitHub Actions
 - Figma
 - VS Code
 - Linux
 - NS3
 - Cisco Packet Tracer
 - LeetCode
 - CodeChef
 - HackerRank
 - CodeDX
- **Projects**
- 2024
 - Tech: React, Node.js, Express.js, MongoDB, Python, TensorFlow, Docker, GitHub Actions
 - coastal-threat-alert-system-two.vercel.app
 - github.com/HEETMEHTA18/Coastal-Guardian
 - Built an AI-powered platform for real-time coastal threat detection using satellite and weather data.
 - Integrated ML models (TensorFlow, scikit-learn) for threat prediction and early warning alerts.
 - Developed a full REST API with JWT authentication and WebSocket for live data streaming.
 - Containerized with Docker and set up CI/CD using GitHub Actions for automated deployment.
 - Interactive dashboard with live maps, community reporting, and mobile-responsive UI.
 - 2024
 - Tech: TypeScript, React, Node.js, WebSocket
